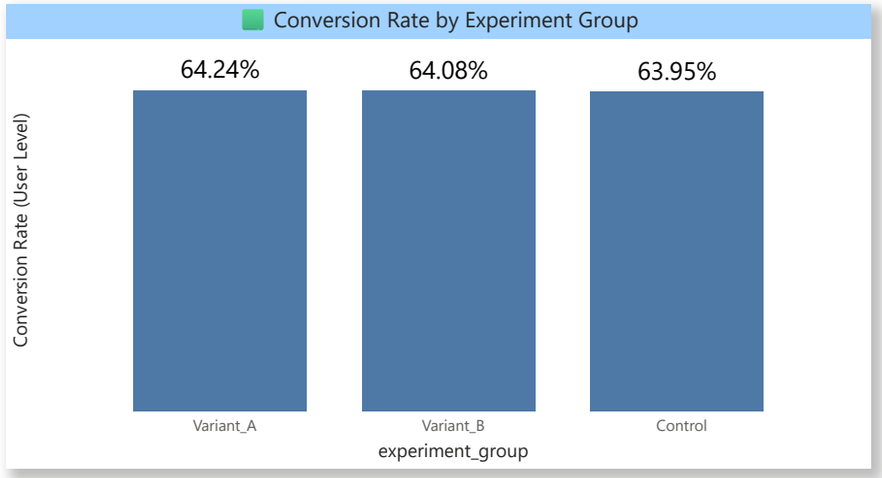
Bounce Count

Bounce Rate: Rate of users who leave the site without engaging beyond the first page.

- Conversion rate is relatively high (~64%)
- Majority of users come from US and IN markets
- Mobile and desktop usage are almost equally distributed
- Significant drop occurs between add_to_cart and purchase stages

A/B Testing Results

CR Control	CR Variant A	CR Variant B
64.0%	64.2%	64.1%
CR Control	CR Variant A	CR Variant B



Lift B	Lift A
0.2%	0.5%
Lift B	Lift A

Variant_A shows a slightly higher conversion rate compared to Control.
However, the uplift is marginal (~0.5%) and may not be practically significant.

Recommendation:
Do not roll out yet. Further testing with stronger variations is recommended.
